Office Action Summary

Art Unit: 1617

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 42-55, 102-107 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hodgen (AW) in view of Black (A).

The claims appears to be drawn to compositions and methods of contraception achieved by administering estrogen and/or progestin and an antiprogestin. Hodgen discloses that estrogen-progestin combinations are currently available (see page 66, middle column, last paragraph).

Hodgen also discloses that the antiprogestin RU 486 may be useful as an ovulation inhibiting contraceptive (see page 66, first column - middle column). The claims differ from the cited reference in claiming the combination of estrogen-progestin regimens with an antiprogestin as well as progestin only regimens with an antiprogestin. To combine an estrogen-progestin regimen with an antiprogestin would have been obvious as both are known as contraceptives and the combination would also be expected to have a contraceptive effect. To combine a progestin only regimen with an antiprogestin would have been obvious in view of Black which teaches a progestin only contraceptive (see abstract) and because as stated above it is obvious to combine two contraceptives to be used together for a contraceptive purpose. The claims fail to patentably distinguish over the state of the art as represented by the cited references.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 42-46, 56-81, 94, 98-99 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 5,468,736. Although the conflicting claims are not identical, they are not patentably distinct from each other because the dosages administered overlap.

Claims 42-107 are of this application conflict with claims 42-107 of Application No. 08/462,705. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.
